👤 PROFILE

A freelancer looking for new opportunities to learn and grow as both a person and a developer, I enjoy building web apps, learning new technologies, and improving my older projects with every new skill I learn.

👜 PROFESSIONAL EXPERIENCE

05/2022 – 08/2022
Khartoum, Sudan

Teaching Assistant, Future University [🔗](#)

- Assisted students in turning their ideas into feasible projects which resulted in several projects that would work in the real world.
- Improved students' knowledge about Time Complexity in Algorithms Analysis and Design lab which allowed them to better analyze their code and strive for efficiency.

📁 PROJECTS

06/2022 – present

Comic SD, React App [🔗](#)

- A Sudanese comic website that allows users to view, bookmark, rate, and comment on comics while also allowing admins to manage comic details. Developed for DAR AMMAR INTERNATIONAL COMPANY as their official website and a comic viewer. Styled with Tailwind and uses Firebase as a backend, leveraging its authentication, storage, cloud firestore, and hosting.

04/2022 – 04/2022

Query (Google Clone), React App [🔗](#)

- A search engine for getting up-to-date results using Rapid API [🔗](#)'s Google Search API. The site provides results for a search, news, images, and video search categories. It also has a theme switcher for light and dark modes using React Context Provider.

11/2021 – 02/2022

Mobile Application for Acquiring Medicine in Khartoum (Graduation Project), Flutter App [🔗](#)

- A searcher app for Khartoum residents, inspired by the struggles I experienced when manually looking for my mother's medication in Khartoum. The app saves users time, provides prices ranging from cheapest to most expensive and pharmacy locations as well as provides the pharmacist with an easy and on-the-go means of managing their medicine database.

EDUCATION

11/2017 – 03/2022
Khartoum, Sudan

B.Sc. in Computer Science, Future University 
CGPA 3.59

SKILLS
